

<https://gorrastyleapp.web.app>

The image shows a web browser window and a VS Code terminal. The browser window displays a "Get started" page for a Vite project. The page features a 3D cube with the React logo on top and the Vite logo on the bottom. Below the cube, the text "Get started" is displayed in a large font. Underneath, it says "Edit `src/App.jsx` and save to test HMR". At the bottom of the page, there is a purple button that says "Count is 0". The browser's address bar shows the URL `http://localhost:5173/`. The VS Code terminal window is open below the browser, showing the command `npm create vite@latest .` being executed. The terminal output indicates the local URL is `http://localhost:5173/` and provides instructions on how to use the `--host` flag and the `h` key to show help.

gorrastyle X

http://localhost:5173/

Get started

Edit `src/App.jsx` and save to test HMR

Count is 0

PROBLEMS OUTPUT TERMINAL ... node + -

PS C:\Users\paula\OneDrive\Desktop\GORRASTYLE> npm create vite@latest .

→ Local: `http://localhost:5173/`
→ Network: use `--host` to expose
→ press `h + enter` to show help
